David,

The IBERS group that is working on Miscanthus will be visiting on Nov. 13th. Did you meet with them during their first visit? In any case, the group (6) would like to meet and discuss possible collaborations including wide hybridization opportunities on Nov 13th morning (they fly out from Houston Friday pm). If you are available (Bill will be in Illinois), and you and Bill have time to discuss what you want from them then we can move this along. We may need to get an NDA in place.

Are you available on Nov 13th?

Thanks,

John

John

Yes, I think that it is important to have access to Miscanthus that is not restricted. It is probably worth pursuing, at least initially until we know the cost.

Regards,

Bill

Bill,

I talked to Iain at the IPMB congress in St. Louis this week. He wants to meet to discuss possible collaborations on Miscanthus X sorghum on Friday Nov. 13th. I will try to get something organized. Maybe David Stelly can give them an update on wide hybrids if you and he agree.

Are you still interested in developing a way to access IBERS germplasm? If so, lets get Brian involved.

John

I don't know if John has responded, but I'm scheduled to be in Illinois on Nov 12 and 13. Therefore, I will be unavailable for meeting at that time. If John is available, he can certainly represent the TAMU program activities.

Regards,

Bill

Bill, John

A group of us from IBERS at Aberystwyth University will be at College Station on 12th November to meet with Ceres at their field station. Would either of you or your colleagues find it useful to catch/ pick up on some of the discussions we had last year? We can book our return flight out of Houston for the evening of 13th November and so could call into TAMU during the morning or early afternoon if this was convenient and useful?

Best regards lain
