John:

I pulled the table out of another presentation, please modify as need be to convey the point.
Also, you should point out the following:

1. this is screening of 2008 material; we are just bringing in the final samples from 2009
2. This is using the first generation calibration curve; we know it is not perfect, but we'll have a second generation curve sometime this fall. We will rerun all the 2008 data and use it for the 2009 data.

Thanks for presenting. I will not be there as I'm going to Darrell Rosenow's funeral.

Regards,

Bill

Bill,

If you have a slide summarizing ranges of sorghum composition based on NIR I would like to use it for the Chevron report in Weslaco,

Thanks,

John

Composition Variation
