Sue

Since this was a pdf file, I couldn't edit. I added sticky note comments to your document.

For the most part, I think it is fine, with just a few minor comments.

The biggest concern that I have is your last objective. Your objective is to fine map and clong a QTL. Given the crop and resources you have listed, I think that will be difficult if not impossible.

I would reconsider this objective and make it reflective of what you can realistically accomplish with the resources and timeline that you have.

Regards,

Bill

Subject: PhD Proposal

Dear Dr. Rooney

The earlier proposal i sent was missing its fist page... Sorry for that. I am resending it.

regards
Sue
