Dr. Rooney,

I was one of your student taking Plant Breeding course. I was working with Dr. Kamal El-Zik and Dr. Peggy Thanxton. I completed my PhD in 2002 and came back to Turkey.

First of all i would like to thank to you for providing seeds for our project. Actually project started by Dr. Aydin. Since he left to USA, I have to complete it. Initially, the parents we used had very different flowering times and i have got difficulty in crossing. With the material you are going to send we will have a chance to complete this project. In the agreement you send it, it is mentioning the development of RILs. Actually i have no time to develop RILs. For mapping purpose i am going to use F2s. So i need only parents and F1s to develop F2s for phenotyping. After completing mapping, i would like to add your name on the paper and publish it together. The seeds will not be use after mapping and totally destroyed.

As soon as i complete the signature i will send the agreement.

Thank you very much.
