---

Hi Bill,

We reduced the number of lines for planting in [REDACTED] (Table attached).

We do not have 90 seed for one promising line [REDACTED] which I would like to try to cross. Would it be okay to provide fewer seed, or perhaps you have seed for this one in stock? GRIN said they were out and in the process of generating more last time we checked.

I will bring seed over first thing Monday am.

Among the vPS lines previously identified in PR (like [REDACTED] planting in mid Nov to mid Dec resulted in anthesis in [REDACTED] (mid March?) just as a frame of reference.

John
