Hi Richard,

I promised to connect you with some of the program area leads with the Genetic Biocontrol of Invasive Rodent's partnership.

I've cc's the following folks here so that you can reach out to them directly.

Dr. David Threadgill (TA&M, native gene drive t-complex mouse construct development)

Dr. Paul Thomas (U. of Adelaide, CRISPR gene drive mouse construct development)

Dr. John Godwin & Dr. Fred Gould (NCSU, invasive mouse mate choice/reproductive fitness & modeling)

Dr. Peter Brown (CSIRO, ecological risk assessments)

Royden Saah (GBIRd coordinator, Island Conservation)

Dr. Karl Campbell (Island Conservation, GBIRd Program Director & Island Selection Criteria)

Please let us know how we can be of further assistance with your story.

Best,

Heath Packard

Hi Richard,

Great to hear from you and thank you for your interest.

I'd be happy to do a background interview with you on Monday if you can give me some times that will work for you. I'll be on Pacific Daylight Time at that point.

I serve as the program coordinator for the Genetic Biocontrol of Invasive Rodents partnership and can give you a solid overview and then work with you to identify who you'd like to interview for your story. So, you've come to the right place!

Here are a couple of background pieces for your review in the meantime.

Subject: Scientific American journalist request

Press/Communications Office:

I'm looking into the possibility of a piece for

Scientific American, where I am a frequent contributor, about synthetic biodiversity conservation, and

I'd like to have a preliminary conversation either with Karen Poiani or with a member of the science team involved in the house mouse project

.

I'm around today, or could do a phone or skype conversation early next week.

Short bio note below by way of introduction.

Thank you.

Best wishes,

Richard Conniff
