Hi folks,

I need to send in the slides for the Safe Genes kickoff meeting tomorrow and am attaching a draft of those here. I know at least Jason is working on slides for this and anticipate doing so through the day tomorrow myself. If you could have a look particularly at parts related to your aspects of the project and offer suggestions/corrections/commentary, I'd be very appreciative. I think it needs some condensing towards the beginning probably and helpful graphics towards the end would be good if possible as it is too text-heavy there.

Just as a reminder, this is supposed to be 25 minutes and they don't give a lot of direction on precisely how they'd like us to structure it. Since it is supposed to be largely for informing other teams what we will be doing to encourage sharing across the larger group, I took that to indicate we should lay out what our project will entail and so tried to follow the SOW.

My apologies for not getting this out sooner. Afraid the last couple of weeks have been very busy ones. If you do send a version back with corrections/suggestions, please add your initials at the end of the file name and ideally change any text you edit to red font to make it easy to spot.

Thanks

, John
